

Flight Systems Industrial Products (FSIP)

With over 45 years of experience in remanufacturing and legacy manufacturing, FSIP provides electronic products used on electric and gas powered vehicles and equipment. As an ISO 9001:2008 certified supplier, partnering with FSIP ensures superior and reliable products, while offering choices and significant savings. Alliances with many of the leading electronic and vehicle manufacturers, allows FSIP to deliver products that will assist in the growth of your company and bring you a competitive advantage.

Electric Boats

Electric boats have been in existence for over 100 years. Although, in the last twenty years there has been a resurgence and elevated demand due to the environmentally friendly advancements in battery, motor and controller technology.

Flight Systems Industrial Products specializes in electronic products for a variety of electric powered boats. Products and support include remanufactured controllers and battery chargers along with new controllers, solenoids, test equipment and upgraded conversion kits for sailboats, passenger, hybrid, yachts, tour and fishing boats including boats manufactured by Lear, ElectraCraft, Duffy Boats and more.

Remanufactured Products

FSIP offers over 8,500 remanufactured part numbers including AC and DC controllers, joysticks/control handles, battery chargers, DC/DC converters, accelerators, dash displays, battery discharge indicators, combustion engine controls, conversion kits and panels.

All FSIP controls are analyzed by certified electronic technicians, failed and stressed components replaced and controls upgraded to the latest specifications. FSIP controls are fully load tested to ensure quality and backed by a one year warranty.

New Products

FSIP is the exclusive manufacturer of GE electric vehicle controls & parts, acquiring this product line in 2010. They also provide legacy manufacturing to vehicle and electronic OEMs and specialize in "small run" manufacturing.

FSIP is a distributor for Curtis Instruments products and stocks many popular part numbers for quick delivery. Dedicated sales and engineering staff are available to assist with design and development of new applications.

Your technicians will benefit from various test equipment products that are in stock and ready to ship along with technical training classes and an online forum for support.

FSIP is your single source, with a wide range of products and services.
