

GE LX HANDSET & SENTRY SOFTWARE TRAINING VIDEO

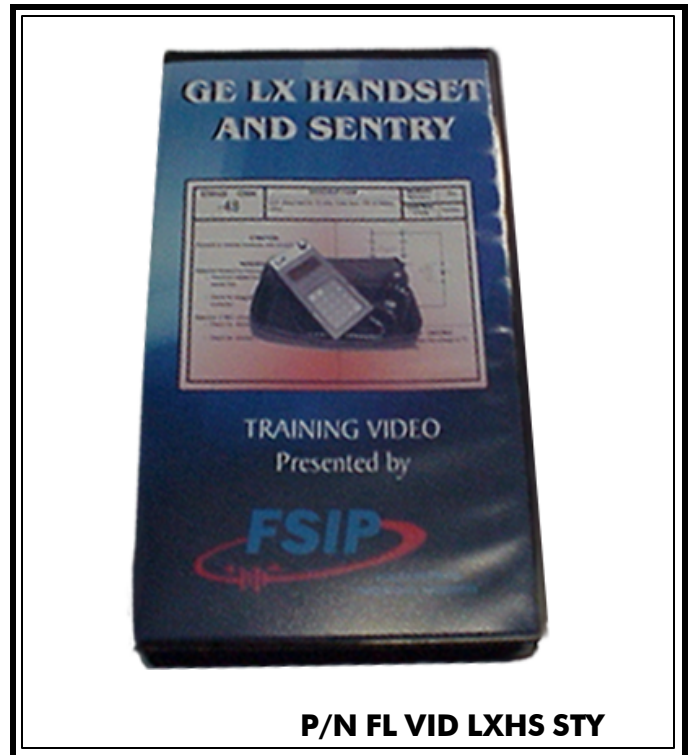

APPLICATION:

GE LX HANDSET AND SENTRY SOFTWARE VIDEO is one in a series of FSIP Training Videos that is designed to assist in training service technicians on GE electric vehicle control systems.

Great for in-house service schools to teach new technicians on the latest GE electronic control systems, this video is a full instruction on the use of these specialized tools so that you will be able to troubleshoot and adjust vehicle parameters to precise settings.

FEATURES:

- **LX HANDSET INSTRUCTION** - A full guide on the LX Handset itself. Covers the unique display and key pad setup.
- **FUNCTION SETTINGS** - Small adjustment pots are a thing of the past. Functions are now in the control system settings. This section gives you a complete guide on what the Functions are and how they are set using the LX Handset.
- **STATUS CODES** - The newest controls have a self diagnostic feature built into the control system. We will show you how to troubleshoot the vehicle using these codes and show you how to read the status code diagrams. We will also show you how to access stored status codes for a complete vehicle history.
- **GE SENTRY SOFTWARE** - The latest controls will communicate with a laptop or computer to troubleshoot or adjust all the control system settings. This section will show you how to use the software.

SPECIFICATIONS:

- Approximately 35 minutes in length.
- VHS format with hard shell storage case.
- Includes a LX Handset instruction booklet and quick code reference chart.

OTHER VIDEOS AVAILABLE:

- GE EV100 LX/ZX SYSTEM THEORY
- BASIC FORKLIFT ELECTRONICS
