

HANDSETS/PROGRAMMERS

CURTIS 1313 DEALER LEVEL HANDSET

The Curtis Model 1313 Handheld Programmer is a powerful and intuitive programming and diagnostic tool. Model 1313 enables parameter files to be created and edited online or offline, transferred to another controller for cloning or saved onto a PC or SD Card.

FEATURES

- Cloning feature and 64mb internal memory allows multiple parameter files to be stored in the programmer making transferring settings easier.
- Comprehensive help text offers solutions and information at the touch of a button.
- AA battery compartment allows programs to be edited without having it connected to a system.
- Multiple language support includes English, German, Spanish, French and Italian.
- Easily upgradeable via USB to ensure compatibility with future products and features.
- Soft Keys (located under the LCD) change function as indicated by screen text to provide quick access to the most commonly used functions.

NOTE: Does not allow changing of speed codes on Club Car vehicles. For questions regarding what parameters can be adjusted please refer to the controller or vehicle manual.

Kit Includes:

- Handheld Programmer
- 4-Pin Molex Cable
- USB Cable
- Case
- Quick Start Guide
