

GREEN6

3-Phase

Battery Charger

The **GREEN6** power module based charger is a high-frequency, fully automatic charger for use with lead-acid, sealed and gel traction batteries. **GREEN6** offers high-energy efficiency that reduces operating costs while the power module system eliminates downtime, increasing productivity.

Features:

- Soft Start Charge Cycle
- Voltage Drop Compensation
- Protection against Reverse Polarity
- Wall or Floor Mount Options Available
- Charge Cycle Begins with Batteries as low as 2 Volts
- USB Port Allows Programming and Download of last 300 Charge Cycles
- Power Module System Allows Charging To Continue Even If a Module Stops Working
- Backed by a One Year Warranty
